ECOMREPORT

MONITORING DATA TREATMENT AND ANALYSIS SERVICE

EcomReport is linked to the **Ecomzen** and **Ecomsmart** solutions, which are multiparameter, stations connected to the web platform, for monitoring air quality.
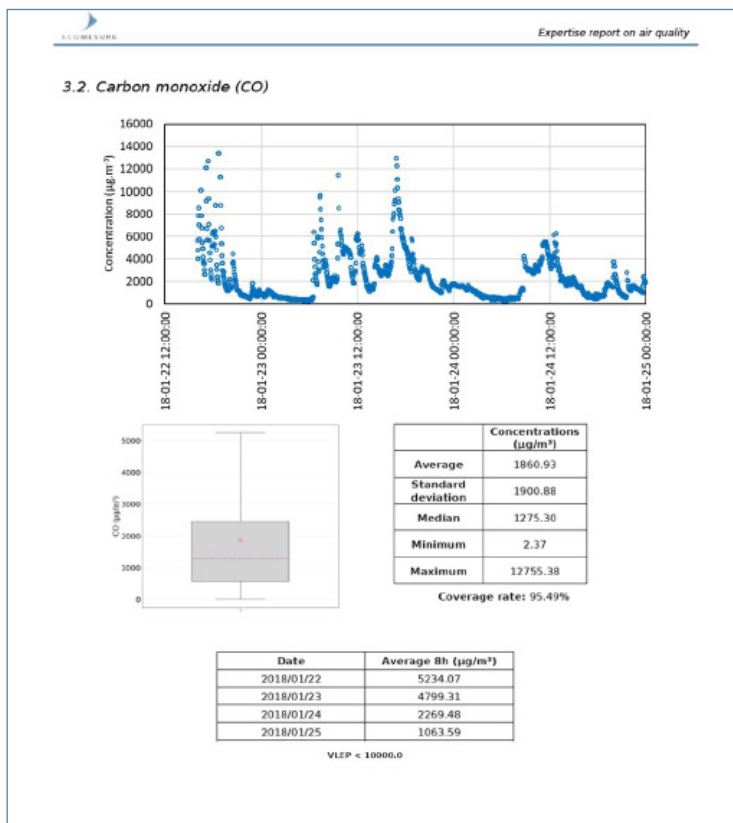

EcomReport is a new service for editing automated and personalized reports in SaaS mode, which simplifies the treatment and interpretation of measurement data.

The reports can be used directly and provide a statistical study of the variations in the measurement parameters.

A camparison with the recommended limit values, the guidance or regulatory values in force nationally or internationally is also offered.

Secure i-comesure.com server

BENEFITS

- Editing of automated reports
- Simple interpretation of data
- Identification of peaks in pollution
- Assessment of exposure to pollutants
