

ECOMESURE

On display this month, the Japanese brand Kanomax's particle counters, for all your measurements in controlled environment.

The ECOMESURE team is at your disposal for any questions

3910/3905 PARTICLE COUNTER

Compact and easy to use, the Particle Counter is available in two versions, the 3905 (flow rate 30lpm) and the 3910 (flow rate 50 lpm). These devices simultaneously measure and display the concentration of 6 different particle sizes: from 0.3 to 10 μm . ISO 21501-4 compatible, the devices allow ISO 2 certification.

Applications:

- Cleanroom certification
- Filter integrity tests
- Controlled environment monitoring

Commercial contact: david.ledur@comesure.com

HANDHELD CONDENSATION PARTICLE COUNTER – KANOMAX 3800

The 3800 Handheld Condensation Particle Counter measures in real-time the concentration of particles between 0.015 μm and 1 μm and from 0 to 105 particles/cm³. It has an aerosol flow rate of 0.1 lpm and a total flow rate of 0.7 lpm. Compatible with seven different applications, the CPC is a reference according to NIOSH recommendations.

Applications:

- Indoor Air Quality
- Study of the workplace
