ECOMESURE

This month, come and explore our new website! More than a new visual identity, the site was designed to reflect the company's new dynamics, entirely focused on customer satisfaction. You will find the possibility to make online applications (quotations, product rental, training ...) with easy access to information about our products and services. Online sales will soon be available.

The ECOMESURE team is at your disposal for any questions

FIELD ASYMMETRIC ION MOBILITY SPECTROMETRY LONESTAR

The LONESTAR device is used to separate most chemical compounds using FAIMS. Detected compounds can be visualised in real time using adapted software. All data can be immediately sent via Ethernet, USB, GPIO or wireless Bluetooth and then processed via remote control and analysis software. LONESTAR is a low-priced and easy to use product.

Many applications result of its high selectivity:

- Defence
- Food industry
- Pharmaceutical industry
- Gas and petrol
- Research
- Health

Commercial contact: david.ledur@comesure.com

Attached you will find the product datasheets. For further information, the ECOMESURE team is at your disposal.
