

RECYCLING PROGRAM

As Ecomesure is environmentally conscious, it recycles electronic components and repackage its sensors' cartridges.

i As electrochemical sensors have a limited lifespan, we recommend that you replace the sensor cartridges in our products once a year to ensure the accuracy of the measurements.

+ ADVANTAGES

- + Repackaging is carried out in less than 24 hours
- + Straightforward delivery and logistics
- + New and calibrated sensors
- + Accuracy of measurements guaranteed for 12 months
- + Credit note issued on receipt of the old cartridge

RECYCLING PROGRAM

How does it work ?

1. Register (for free!) to join the recycling program
2. Operate the station for the recommended period (generally one year)
3. Receive an alert by SMS and/or E-mail that the sensors are nearing the end of their cycle
4. Order a new cartridge from Ecomesure
5. Receive a repackaged and calibrated cartridge, ready for use
6. Replace the old cartridge in seconds
7. Send the old cartridge to Ecomesure at: **4 rue René Razel, 91400 Saclay, France**
8. Apply a credit note for **25%** of the price of the new cartridge

We will monitor how long your cartridge will last and notify you on our web platform.

Objet: [Calibration] Cartridge alert for ECM ECS-N-GW-00011

Dear Calibration_customer,

A message has been released for the sensor ECS-N-GW-00011 - #ECS-N-GW-00011 :
 On Nov. 8, 2018, 7:43 a.m. (UTC) cartridge status is: CHANGE CARTRIDGE.

Sincerely,

Calibration

Thank you for helping to keep our planet clean and preserve its resources!
